Technical data

Porsche Centre information

Winter has the shortest days of the year.

So make sure you enjoy every hundredth of a second.

Your Porsche was designed for everyday use, so there is no reason why it should be forced to take shelter in the garage through the winter months. Enjoy uninterrupted driving pleasure in the colder months, and even enhance it with the Porsche range of winter wheels and tyres.

Commonly used across Europe, winter tyres are designed primarily for added safety. However, they also deliver improved performance and everyday practicality, allowing uninterrupted driving through the coldest weather.

Porsche has always set new standards.

This applies not only to the development of its vehicles, but also when it comes to custom retrofitting and accessories for Porsche models. For over 20 years, Porsche Tequipment has developed attractive and functional products which allow any Porsche to be used in any circumstance for any purpose.

With over 20 years of experience and expertise, Porsche Tequipment stands for one thing: customary Porsche quality. Porsche Tequipment products are developed, fine-tuned and tested for the complete vehicle by the Porsche engineers in Weissach, and have to meet the same quality and safety standards as Porsche vehicles. The products must withstand continuous loads on special test stands.

They are subjected to driving dynamics tests and adapted to the vehicle's overall aerodynamic concept in the wind tunnel. For optimum performance – with optimum everyday usability. By meeting these high standards of quality, the vehicle warranty remains entirely unaffected when Porsche Tequipment products are used.

Porsche Tyre Hotel

After you have considered the purchase of a set of wheels and tyres from Porsche Tequipment, you may question where you will keep them when they are not fitted to your Porsche.

Porsche recognises that owning two sets of wheels and tyres and keeping them in the correct place for use at the correct time, might seem logistically complicated. For this reason, Porsche has introduced an initiative to ensure that your purchase and ownership experience of a Porsche Tequipment winter wheel and tyre set is as convenient as possible.

The Porsche Tyre Hotel service continues to provide a convenient storage solution for your wheel and tyre set. The programme offers you the opportunity to store your summer wheels and tyres safely and securely, through your Porsche Centre, whilst your winter wheels and tyres are in use. The service is also available during the summer months when you wish to store your winter wheels and tyres.

For more information, please contact your local Porsche Centre.

Winter wheels and tyres explained

Your Porsche thrives in all conditions. However, all summer tyres begin to harden below 7ºC and cause braking distances to increase.

This is why we recommend the use of winter wheel and tyre sets from Porsche Tequipment below this temperature. All the winter tyres in this range have been co-developed, tested and approved by Porsche so you can rest assured that they conform to the Porsche specification. This is indicated by the special Porsche designation (N0, N1, etc.) on the sidewall.

There are many benefits. Your vehicle will continue to provide the high standards of driving safety for which Porsche is renowned, the tyres have been optimised to produce less noise, rolling resistance is reduced and fuel economy is improved. Most importantly, braking distances are shorter, not only compared with summer tyres but also with all-season tyres.

In addition, tyres with our 'N' marking are designed exclusively for Porsche vehicles and meet high standards for driving stability, comfort and fuel consumption.

They also offer optimum compatibility with the functions of Porsche chassis control systems, |with no risk of damage to components or wheel clearance problems. They meet our requirements for durability and stability at high speed. Our winter wheel and tyre sets are styled to complement your vehicle, for an overall appearance that is harmonious as well as sporty. On the following pages, you will find the appropriate winter wheel and tyre sets and the optimum accessories for your Porsche model.

Your Porsche Centre will be happy to answer any of your questions regarding the best wheel and tyre set for your Porsche and also to advise you on the other services that we have to offer, such as tyre checks, tyre changes or tyre storage.

Winter wheels and tyres in action

To demonstrate the full capabilities of winter wheels and tyres in comparison to summer wheels and tyres, a video has been produced at our Porsche Experience Centre, Silverstone. The video features the Porsche Macan and Porsche Boxster GTS performing acceleration and braking tests on low friction surfaces.

Please click here to see winter wheels and tyres in action.

Winter wheels and tyres explained

Braking with ABS on wet road surface (49 – 0 mph) at +3 °C

Braking with ABS on snow (24 – 0 mph)

Braking distance in % (measured with the use of tyres conforming to the Porsche specification).
Braking distances optimised by the use of Porsche winter tyres. Absolute values may vary.

Driving with summer tyres during the winter season is risky. When the temperature drops to 7°C and below, they lose the elasticity which ensures optimum performance in rain, snow and ice.

Chart supplied by Pirelli

718 Boxster and 718 Cayman

Handling with precision. In all seasons.

The story of the 718 began in the 1950s when Porsche demonstrated its prowess for high-performance over enduring distances. Utilising a lightweight design and a mid-engine concept, the 718 dominated the Targa Florio hill climb and was highly competitive at the 24 Hours of Le Mans. This strong history required a model of equal stature to display the 718 moniker: enter the new 718 Boxster and 718 Cayman.

Both models offer high levels of responsiveness and unparalleled handling characteristics. So during winter, Porsche Tequipment winter wheel and tyre sets can ensure that the performance levels of your 718 will always represent the 718 name to its fullest potential.

19-inch Boxster S wheels[1]

Front: 8J X 19 ET57
Rear: 10J X 19 ET45
Front: 235/40 R19 92V M+S

911 (Type 991)

**Snowflakes and the 911 have one thing in common.
No two are ever the same.**

Whether your 911 is two-wheel drive or all-wheel drive, coupé, Targa or cabriolet, it has been specifically designed to optimally deliver the power of the engine to the road with the best use of its advanced traction systems.

With Porsche Tequipment winter wheels and tyres your vehicle's level of traction can be maintained throughout the winter months when temperatures drop.

Motorsport

**Changing conditions are a part of motorsport.
The right tyres at the right time is a winning combination.**

Porsche has form for overcoming contradictions. We create sports cars for every day. We create high performance with low fuel consumption. We create race cars for the road. Your GT vehicle can now take on a new tyre strategy through this year's winter testing. A strategy that will see high performance meet endurance through unpredictable weather conditions. One formula for a great race.

Panamera

You sometimes need courage to take on the elements.

Panamera model year 2017 onwards

The concept of the Panamera goes against many of the established rules for premium vehicles. It uniquely combines design, performance and the driving pleasure of a sports car with the comfort and exclusivity of a premium saloon. So, instead of compromising the sports car performance and impressive comfort levels, Porsche Tequipment winter wheels and tyres will deliver both throughout the winter months giving you all-year-round driving pleasure.

Panamera Sport Turismo

Distinguished by a distinctive design that stylishly clothes the greater passenger and luggage space, the Panamera Sport Turismo is more versatile than any other model in its class.

With a large tailgate, low boot loading sill, increased luggage compartment volume and 4+1 seating for the first time, the Panamera Sport Turismo offers the perfect combination of everyday usability and superior sportiness.

21-inch Panamera SportDesign wheels[1]

Panamera (model year 2009-2016)

As a child, you couldn't wait for the first snow. Nothing's changed.

Your Panamera is a Gran Turismo, built to convey the classic driving experience and to bring you close to the road. The concept incorporates four doors and four seats, typical Porsche performance, and lots of comfort for long journeys and everyday use. It is a sports car for four, even in winter, thanks to the winter wheel and tyre sets from Porsche Tequipment.

You didn't entertain the idea of compromise when you purchased your Panamera, so why should choosing your wheel and tyre combination be any different? With these wheels, there is only one style: 100% sports car. Lightweight, dynamic and exciting for increased driving pleasure and safety.

Porsche Tequipment offers a range of wheel and tyre sets for better grip and a sporty appearance.

New Cayenne (model year 2018 onwards)

Explore your own direction. Even in winter.

The new Cayenne range is the third incarnation of this sports car SUV and brings a dynamic design and an efficient turbo unit, along with an exceptional digital network which brings the whole world into the cockpit.

The new Cayenne and Cayenne S engender the versatility of a spacious 5-seat configuration and extensive luggage space combined with high quality technologically advanced materials and new cutting-edge driver assistance systems. But above all the Cayenne remains what it has always been: a true sports car.

Our winter wheel and tyre sets complement your Cayenne and make an important contribution to safety in adverse weather conditions.

Cayenne (model year 2011 – 2014)

**Sledges, skis, snowboards, ice skates, Cayenne.
The usual winter sports equipment.**

Your Cayenne is charismatic, powerful and versatile. While its performance on the road is impressive, its off-road performance and everyday practicality are extraordinary – just like the vehicle itself. But the Cayenne is equally adept on other surfaces such as snow and slush. To help you follow the ideal line in winter, we have the appropriate tyres.

The winter wheel and tyre sets from Porsche Tequipment not only improve your safety, they also enhance your driving pleasure.

Macan

Traction when you need it most. In a life, intensified.

The Macan boasts superb practicality whilst delivering uncompromised Porsche performance. The sports car amongst all SUVs, the Macan uses Porsche Traction Management and the Porsche Doppelkupplung transmission to deliver its power where it needs it most: the road.

The grip levels of the Macan can be even further optimisedwith the use of a winter wheel and tyre set, available through Porsche Tequipment.

Winter accessories

There is a lot you can do in winter. You can do a lot for your Porsche too.

Your Porsche was designed for everyday use. It is a car for all seasons, winter included. With the Porsche Tequipment range of accessories, you can be sure that you are ideally equipped for the colder months of the year.

Participate in more winter activities as well as driving your Porsche. With accessories like roof boxes and a ski/snowboard carrier from Porsche Tequipment, creating extra room for your winter gear is not a problem.

Tequipment accessories finder

To make it even easier for you to find every winter accessory for your Porsche, the new 'Tequipment accessories finder' on www.porsche.co.uk details every accessory available.

Designed for optimum viewing on all devices, it is easy to navigate, provides the essential facts about every accessory and includes a wish list feature.

Ice scraper

With telescopic handle in aluminium and integrated rubber lip.

£12.00 (RRP) including VAT

All-weather floor mats

Set of two or four in an attractive design with a silhouette of the vehicle and "PORSCHE" logo. Non-slip and waterproof with raised edging.

From £75.00 including VAT

Winter care kit

Care package in a waterproof bag with practical inner compartments. The set includes concentrated winter glass cleaner (two bottles with 1,000ml each), window cleaner (250ml bottle), interior glass cleaner (100ml bottle), ice scraper and microfibre cleaning cloth.

£66.00 (RRP) including VAT

Snow chains

Two chains with fine-link chain strands. Please note: not available in conjunction with wheel spacers. Snow chains must only be fitted on the rear axle.

From £363.00 including VAT

Luggage compartment liner

Custom-fit protective liner with "PORSCHE" logo. Waterproof and washable. With handles.

From £69.00 RRP including VAT

Concentrated winter glass cleaner

Concentrated windscreen washer fluid, 1,000ml bottle. Can be used down to –48°C undiluted. Removes winter-related dirt deposits on the windows and protects the windscreen washer system against frost.

£6.00 (RRP) including VAT

Ski/snowboard holder, easy-loading+

For up to six pairs of skis or four snowboards (approx. 60cm load area).The practical slide-out function enables comfortable loading and unloading. Only in conjunction with roof transport system.

From £230.00* RRP including VAT

Roof box

Lockable plastic container with a capacity of approximately either 320 litres or 520 litres. Can be opened from either side, and the roof box 520 has an integrated ski carrier. Available in black (high-gloss) or platinum look. Only in conjunction with roof transport system.

From £832.00* including VAT

Roof transport system

Suitable for all Porsche load-carrying devices (e.g. roof box, bicycle rack, racing bike carrier, ski/snowboard holder). Roof load is 60-100kg dependent on model, suitable for Tequipment transportation modules. NB: please follow the instructions in the vehicle handbook.

From £170.00* including VAT

Outdoor car cover

Tailored outdoor car cover in silver colour with full-colour Porsche Crest and "PORSCHE" logo. Water-repellent, it provides excellent protection against a range of weather conditions including strong sunlight. Includes anti-theft protection.

From £201.00 including VAT

+not available for 718 models

*Illustrative price provided for guidance only. The price is not a recommended retail price.
