

Additional information on joint responsibility in the context of research and development drives

Which parties are jointly responsible?

The following parties are jointly responsible for the implementation of group-wide research and development drives in accordance with Art. 26 GDPR:

Dr. Ing. h. c. F. Porsche AG

Porscheplatz 1, 70435 Stuttgart, datenschutz@porsche.de

registered in the commercial register of the Stuttgart District Court under the registration number HRB 730623 ("Porsche AG")

and

CARIAD SE

Berliner Ring 2, 38440 Wolfsburg, data_protection_cso.vwag.r.wob@volkswagen.de

Registered in the Commercial Register of the Local Court of Braunschweig under the registration number HRB 208203 ("CARIAD SE")

and

AUDI AG

Auto-Union-Str. 1, 85057 Ingolstadt, datenschutz@audi.de

registered in the commercial register of the Ingolstadt District Court under the registration number HRB 1 ("Audi AG")

and

Volkswagen AG

Berliner Ring 2, 38440 Wolfsburg, dataprivacy@volkswagen.de

registered in the commercial register of the Braunschweig District Court under the number HRB 100484 ("Volkswagen AG")

What is the reason for joint responsibility?

Porsche AG, Volkswagen AG, CARIAD SE and AUDI AG (hereinafter referred to as "Cooperation Partners") work closely together in the field of research, (further) development and testing as well as validation in the areas of driver assistance and driver information systems, driving and comfort functions and other services.

Depending on the step in the process, the processing of your personal data takes place under joint responsibility between the cooperation partners. The cooperation partners jointly defined the processing phases of this data in the individual process stages.

For which stages of the process is there joint responsibility?

The joint responsibility of the parties includes the collection, storage and usage of video and image data. The data is recorded through the use of sensors, measuring devices and video measurement technology in and from public traffic areas as well as on private factory, test- and other sites. The recorded data is then transferred to a secure cloud environment of the cooperation partners and stored. This information is used for statistical research and analysis purposes as well as for the (further) development and validation of vehicles, functions and systems as well as other services.

The joint responsibility for data processing is therefore divided into **the following phases**:

Data processing phase	Key content of the phase	Responsible Party:
Data collection in the context of test drives	Acquisition of environmental data including video material	The respective executing party
Storage of the collected data	Operation and implementation of an IT system for the storage and processing of data	CARIAD SE
Retrieval of data from the IT system	Leverage existing data to develop and improve features and services	The respective executing party

Each party is solely responsible for data processing outside the common IT system or post-retrieval processing.

What have the parties agreed?

As part of their joint responsibility under data protection law, the parties have agreed on the division of tasks set out above and that the party collecting the data also fulfils the information obligations under Articles 13 and 14 of the GDPR with regard to joint responsibility.

What does this mean for the people affected?

You can assert your rights as a data subject against any of the above-mentioned cooperation partners. The cooperation partners inform each other immediately about inquiries from data subjects and provide each other with all information necessary to answer data subject inquiries.

The exercise and fulfilment of data subject rights will often require further information from the data subject, depending on the individual case, in particular information on the place and time at which they could be affected by the processing (i.e. details of when and where you were in the vicinity of a vehicle). This additional information may be necessary to determine whether a particular person is affected by the processing at all and to actually be able to fulfil the rights listed below, such as access, erasure, etc.
