Finally a sports car with no rational arguments.

718 Spyder concept.

A firebrand. A go-getter. Aiming for the skies. The 718 Spyder is an exclamation mark in a world full of 'what-ifs'. And it is a promise – to every road and to every driver. Because here comes a roadster like no other. Without compromise. Without regrets. Without rational arguments.

How about instead unrestrained emotion and a good headwind? With a high-agility, mid-engined concept that will bring tears of joy to the eyes of all sports car fans. With a lightweight hood you'll probably never close. With a six-cylinder naturally aspirated engine, sports suspension and door pull loops – essentially everything that your everyday life doesn't need, but your heart yearns for.

With all this, the 718 Spyder only has one aim: to rob you of your sleep – and your common sense. To unleash your wild side. To awaken your most primal instincts. To take you as close to the moon as possible. And even closer to the road.

**The 718 Spyder.
Perfectly irrational.**

**Design and
aerodynamics**

Pure recklessness. At its best.

Design and aerodynamics.

Serpentines. Hairpin bends. Gradients. Mountain races have always been a special challenge. At the start of the 1960s, by creating the 718 RS 60 Spyder, Porsche continued to expand the successful concept of the legendary 550 Spyder and its successor models – lightweight, lower centre of gravity, mid-mounted engine, great manoeuvrability – and sparked waves of excitement in countless mountain and long-distance races.

The design language of the 718 RS 60 Spyder was influenced by its function. Be fast, be agile, win races. And exactly this design language can be seen now in the 718 Spyder. Its unmistakable silhouette with the flyline typical of a mid-mounted engine, for example. Or the front spoiler: elegantly rounded, flattened, closer to the road. The front apron is reduced to the basics. Its clearly defined shape with the typical Porsche sweep tells the headwind what it has to do: create optimum tyre contact pressure. Especially in the corners.

The highly distinctive front spoiler lip with an additional spoiler in front of the wheel arches reduces the aerodynamic lift on the front axle. The central air intake in the front apron also optimises the aerodynamics and channels the air stream up through the air outlet in front of the front lid.

Even the underside of the front spoiler lip has been aerodynamically optimised. Here, the special profiling – similar to a golf ball surface – ensures drag is as low as possible. Air curtains in the front apron minimise the air turbulence created on the wheels and therefore minimise drag by releasing the inflowing air precisely in front of the wheels from the wheel arches.

The large air intakes with air intake grilles ensure a high cooling capacity. Thanks to the honeycomb structure of the grilles, these are aerodynamically more efficient than in the previous model.

The design is additionally rounded off by the 20-inch alloy wheels which sit smoothly in the wheel arch and, thanks to the sports tyres, bring the performance of the 718 Spyder to the road with a large contact surface. The typical 718 lines on the doors direct air to the side air intakes. These supply the mid-mounted engine with fresh air, ensuring that it is efficiently cooled if it gets hot.

The rear of the 718 shows how perfect irrationality can be. The rear is influenced by the characteristic streamliners that visually carry forward the shape of the black roll-over bars. They lend the 718 Spyder its unmistakable look and, at the same time, are reminiscent of the silhouette of one or two of its predecessors.

The distinctive rear spoiler between the tinted taillights emphasises the performance-oriented design. At speeds in excess of 120km/h it automatically extends – and reduces lift for more driving stability.

The dynamic slope of the rear is made up of the diffuser and the concise sports exhaust system. The two Black sports tailpipes are separated further and create the unfiltered sound that, every now and then, silences reason. The rear diffuser creates a very fast flow on the rear underbody and has a decisive impact on reducing the overall lift by 50%. Super sports car technology that makes itself felt every second – in a good way of course.

An aerial photograph of a winding asphalt road on a rugged, rocky mountain slope. A small white car is visible on the road, driving away from the viewer. The terrain is dark and textured with rocks and patches of snow or light-colored soil. The lighting is dramatic, with strong shadows and highlights.

Irrational.

Reason's last step is the recognition that there are an infinite number of things which are beyond it.

Blaise Pascal

Perfect.

Open to everything. Except half measures.

Hood.

Let's face it, you'll barely ever want to close it: the partially electric and high-speed compatible, lightweight hood of the 718 Spyder. It can be opened and closed with ease and enhances the presence of the 718 Spyder, even when closed.

The side profile of the hood is flat and shaped to pass harmoniously into the streamliners over the rear lid. At the rear, the hood tapers into two taut, streamlined fins.

It releases electrically. In a few simple steps, the hood can then be stored under the rear lid – without reducing the luggage compartment volume of course. The hood is also available in two-tone red and black in conjunction with the Classic package. The roll-over bars can also optionally be painted in the exterior colour.

**Freedom doesn't need much.
Only the readiness to let go.**

Interior.

A perfect work enthral with its simplicity. What is true in art and literature can also be applied to sports car construction. Therefore, our engineers have concentrated on what's most important for the interior of the 718 Spyder: the driver – and their unbridled driving pleasure.

This means: sports car ergonomics. Elevated centre console, GT sports steering wheel and shortened gear lever. The Sports seats Plus with raised side bolster offer secure hold, even during dynamic cornering manoeuvres. No exception to the prevailing purism: the headrests are embroidered with the 'Spyder' logo. The seat centres in Race-TEX¹⁾ evoke motorsport emotions every time you take your seat.

1) Race-TEX is a race-track-approved microfibre material with a high-quality look and feel, similar to suede. It has a comfortable, soft grip and offers good hold. It is durable and easy to care for.

Race-TEX is also used on the door pull, the armrest, the steering wheel and on the gear lever/selector. It offers optimum grip and enhances the sporty appeal of the 718 Spyder. The puristic door pull loops also reinforce the impression.

The predominant colour: Black. The only exceptions: the needles on the round instruments are White, the decorative trims on the dashboard and centre console have a paint finish in the exterior colour.

In summary: puristic design – with no additions to distract from dynamic driving.

Spyder Classic interior package.

Even in the 1950s our engineers were a little irrational – in a good way. In 1957, for example, they sent the, then recently tested, 718 RSK Spyder to what is probably the toughest long-distance race in the world; the 24h of Le Mans. One year later it took third and fourth place. Victories in the European Hill-Climb Championship and the Targa Florio followed in 1959. Its direct successor was the 718 RS 60 Spyder. Together they dominated the Hill-Climb Championships for years.

With the optional Spyder Classic interior package, these legends live on in the 718 Spyder. Starting with the specific two-tone look in Bordeaux Red and Black – on request, also available on the hood of the 718 Spyder. In contrast: extended items in Black Race-Tex as in motorsport. The trim strips painted in GT Silver Metallic contour the expressive colour combination with simple elegance, and are reminiscent of the style of historical race cars.

Performance

An open 718 with 4.0-litre naturally aspirated engine: sounds crazy. And insanely sporty.

Engine.

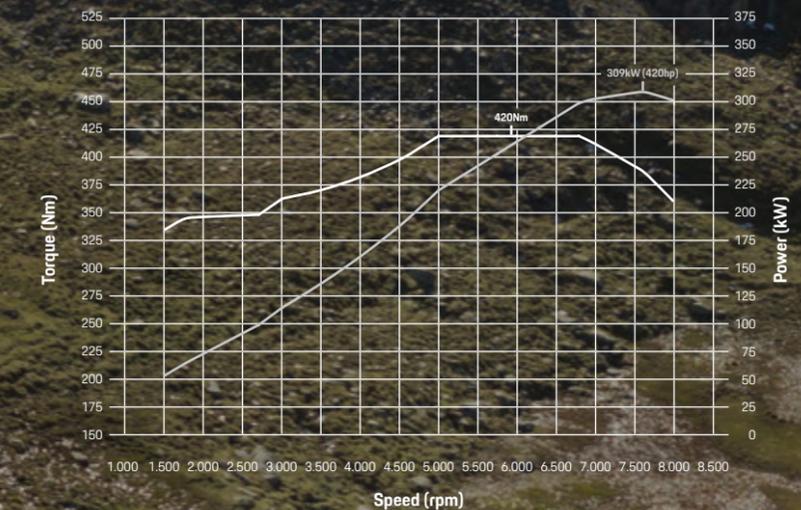

A 718 Boxster with six-cylinder horizontally opposed and naturally aspirated engine. Obviously. But with 4.0-litre displacement? The question has to be asked: "Does it go?" It goes. Like a bat out of hell.

Perfect. Or in other words: the horizontally opposed engine, completely redesigned. Six-cylinder, 4.0-litre displacement, naturally aspirated engine, excellent torque. Presented by our broadly grinning engineers.

With its 309kW (420hp), the engine delivers 45hp more than its predecessors. A variable intake manifold with switchable resonance valves ensures optimal ventilation. As well as direct fuel injection (DFI), integrated dry-sump lubrication and adaptive cylinder control.

The maximum engine speed? 8,000rpm. The maximum torque of 420Nm is available from 5,000 to 6,800rpm. Enough thrust to accelerate the 718 Spyder to 100km/h in 4.4 seconds. Irrational: the sprint only ends the other side of the 300km/h mark.

An acoustic exclamation mark: the sound of the 718 Spyder. Thanks to the precise sports exhaust system with its two clearly separated Black tailpipes, to the left and right of the rear diffuser. For an even more powerful sports car sound at the press of a button.

718 Spyder: 309kW (420hp) at 7,600rpm, 420Nm between 5,000 and 6,800rpm

For fuel consumption and CO₂ emissions, please refer to page 77.

**A lot of handwork awaits you.
And we don't mean making doilies.**

Transmission.

1st gear: start. 2nd gear: acceleration. 3rd gear: raise eyebrows. 4th gear: smile. 5th gear: cheer at the top of your voice. 6th gear: sigh contentedly. And then repeat as often as you like.

The torque transmission in the 718 Spyder is achieved by the precise 6-speed manual transmission with dual-mass flywheel, optimally designed for power. The movements of the gearshift paddles are crisp and short. The driving experience is especially active, intense and pure. The dynamic throttle-blip function plays its part in keeping you, and your endorphin levels, busy.

Porsche Torque Vectoring (PTV) including rear differential lock.

In short: PTV improves the dynamic performance. In detail: the integrated rear differential lock enables higher traction and significantly increased lateral dynamics and vehicle stability during load changes in corners and when changing lanes. In addition, when the car is driven assertively into a corner, brake pressure is applied to the inside rear wheel. Consequently, a greater amount of drive torque is distributed to the outside rear wheel, almost pulling the car into the corner. Steering response is improved, agility is increased.

PORSCHE

118 Spyder

SOPY 718

**The road can sometimes be tough.
Aren't you glad?**

Chassis.

Drifting gently through. Floating along the road on a cloud. A leather armchair on four wheels. To be frank: the 718 Spyder is nothing like that.

The adaptive GT sports suspension of the 718 Spyder is consistently designed so that you experience every centimetre of road as directly as possible. And master every corner. Thanks to the wide toe angle, the streamlined tuning of the shock absorbers and the lowered body, every journey is a wild ride.

The lightweight spring-strut axle at the front is designed in typical GT style, the lightweight spring-strut axle at the rear is adjusted to the high performance of the 718 Spyder with additional reinforcements and springs as well as specific wheel mounts. Ball joints on both axles also connect the chassis to the body in a particularly streamlined way, enabling an even more precise wheel control. Height, camber, toe angle and the anti-roll bars of the chassis can be adjusted individually. The 718 Spyder doesn't just remain true to the track. It also remains true to your adrenaline levels – at the next mountain race for example.

Dynamic transmission mounts.

The electrically regulated system minimises perceptible oscillations and the vibration of the entire drivetrain, in particular the engine. It also adjusts the damping force and stiffness to the driving style and road surface conditions. So that the benefits of a hard and a soft engine mounting arrangement can be used. The handling is noticeably more stable and precise during load changes and in fast corners. At the same time, the vertical oscillations of the engine are reduced during acceleration under full load. The results are greater and more uniform drive force at the rear axle, increased traction and faster acceleration. Whenever a less assertive driving style is adopted, the dynamic transmission mounts soften to provide a heightened level of comfort.

A close-up, front-quarter view of a white Porsche 718 Spyder driving on a road. The car's headlights are on, and the license plate reads 'S-PY 718'. The background is blurred, suggesting motion.

Porsche Active Suspension Management (PASM).

This variable damping system offers continuous adjustment of the damping force on each wheel based on the current driving situation and your driving style. At the push of a button, you can choose between two sporty programmes: Normal mode for sporty driving on public roads and Sport mode for maximum lateral acceleration and the best possible traction on the race track. The body is also lowered by 30mm for a low vehicle centre of gravity. As a result, the pitch and roll are reduced for increased dynamic performance and extraordinary longitudinal and lateral acceleration. The crazy thing: long-distance comfort isn't ignored either.

Porsche Stability Management (PSM).

PSM is an automatic control system for maintaining stability at the limits of dynamic driving performance. In addition to the anti-lock braking system (ABS), it includes Electronic Stability Control (ESC) and Traction Control (TC). Sensors continuously monitor the direction, speed, yaw velocity and lateral acceleration of the car. Using this information, PSM is able to calculate the actual direction of travel at any given moment. If the car begins to oversteer or understeer, PSM applies selective braking on individual wheels to restore stability. What's special about PSM in the 718 Spyder? The sporty tuning with extremely sensitive and accurate regular system interventions. And systems that can be switched off completely in two stages – a feature previously reserved for the GT models.

Wheels and tyres.

The 20-inch alloy wheels of the 718 Spyder are painted in a Silver colour. Upon request, the wheels can also be painted in satin Platinum, satin Aurum or satin Black. The dimensions of the road-approved sport tyres are performance oriented. Specifically, 245/35 ZR 20 on

8.5 J × 20 front and 295/30 ZR 20 on 11 J × 20 rear. Multiple contact surfaces and grip with the reduced tread depth increases, however, the risk of aquaplaning on wet surfaces. Summer tyres are offered upon request for increased suitability for everyday use.

- 1 20-inch 718 Spyder wheel painted in satin Aurum
Porsche Exclusive Manufaktur
- 2 20-inch 718 Spyder wheel painted in satin Black
Porsche Exclusive Manufaktur
- 3 20-inch 718 Spyder wheel painted in satin platinum
Porsche Exclusive Manufaktur
- 4 20-inch 718 Spyder wheel painted in Silver colour

Joking aside.

Safety.

In the midst of irrationality – we can also be extremely sensible. Not just for quality and sustainability but also when it comes to the most important thing: your safe arrival.

Brakes.

They say with great power comes great responsibility. That's when the brakes of the 718 Spyder, derived directly from the 911 GT3, come into play. Specifically, front six-piston, rear four-piston aluminium monobloc fixed brake calipers with Red finish. For greater inherent stability and faster response when applying and releasing the brake, even under extreme loads. The composite brake discs, adapted to the high power output, have a 380mm diameter at the front and rear. They are internally vented and cross-drilled for high thermal load and good responsiveness – even in the wet.

Porsche Ceramic Composite Brake (PCCB).

Motorsport tested: the optionally available Porsche Ceramic Composite Brake (PCCB). With their particularly large brake disc diameters, 410mm at the front and 390mm at the rear, they offer even greater braking performance. The use of six-piston aluminium monobloc fixed brake calipers on the front axle and four-piston aluminium monobloc fixed brake calipers at the rear all with Yellow finish, ensures extremely high, and above all constant, braking pressure. PCCB enables shorter braking distances in even the toughest road and race conditions. The main benefit of the ceramic braking system is its extremely low weight. The brake discs are approximately 50% lighter than cast-iron discs of a similar design and size.

As well as enhancing driving performance and fuel economy, this reduces unsprung and rotating masses. Which results in better roadholding and increased comfort, particularly on uneven roads.

Passive safety.

The safety concept consists of a stiffness optimisation of the body construction, two-piece roll-over protection and two full-size airbags that go off in two stages depending on the type and severity of the accident. Porsche Side Impact Protection (POSIP), comprising side impact protection elements in the doors, thorax airbag integrated into the side bolster of each seat and head airbag for driver and passengers in each door panel ensures additional protection. In short: greater safety – even with an open hood.

Light systems.

So that you always know what's coming towards you, the 718 Spyder is fitted with Bi-Xenon main headlights with integrated LED daytime running lights as standard. Tinted Bi-Xenon main headlights with Porsche Dynamic Light System (PDLS) and LED main headlights with Porsche Dynamic Light System Plus (PDLS Plus) are optionally available.

Interior and infotainment

It fits. Perfectly.

We would love to say “please step in!” but that wouldn’t do justice to your first contact with the 718 Spyder. You slip into it like a hand into a perfectly fitting glove. Everything fits. Everything is tailored to the driver. Mostly due to the sports car ergonomics, perfected over decades. The elevated centre console ensures a short path from the motorsport typical small GT sports steering wheel to the shortened gear lever or PDK gear selector and back. Door pull loops emphasise the puristic, sporty interior. You can also forego the audio and communication system, upon request – if you want absolutely nothing to distract from pure driving.

The instrument cluster with the three round instruments (typical of the 718) and central rev counter provide the driver with all the information they need fast. The dial faces are Black, the needles and increment markings are White, as are the analogue and digital stopwatch of the Chrono Package on the dashboard. The centre of the rev counter features the ‘Spyder’ logo.

The dashboard trim strips and the centre console are painted in the exterior colour. A leather interior package with extensive leather, decorative stitching and Race-Tex items is optionally available. Visual highlight: the dashboard trim strips painted in the exterior colour continue on the doors. An interior package with elements made of brushed aluminium in Black is also available.

In conjunction with the leather interior, packages with decorative stitching can create contrast in the interior, upon request. They are available in Silver colour, Red or Yellow and also include the ‘Spyder’ logo on the headrests as well as the door pull loops. The seat belts can also be in matching colours if desired.

Nostalgia for the history of the 718 Spyder: the optional interior package Spyder Classic in Bordeaux Red and Black. The colours can also be reflected in the hood if desired, and are complemented with extended items in Black Race-Tex and GT Silver Metallic painted trim strips.

The seats of the 718 Spyder also reflect its sporty appeal. The cover, in all seat variants, is in Black leather, the seat centres in Race-Tex. The headrests are embroidered with the 'Spyder' logo in different stitching colours according to equipment package variant.

Sports seats Plus.

The Sports seats Plus, with their sporty streamlined padding and raised side bolsters, provide optimal hold. The backrest can be adjusted electrically and the seat height and fore/aft position can be adjusted mechanically.

Adaptive Sports seats Plus.

The adaptive Sports seats Plus go a step further. They complement the Sports seats Plus with an electric 18-way adjustment. The seats can be optimally adapted to meet your needs in terms of seat height, squab and backrest angle, seat depth, fore/aft adjustment and four-way lumbar

support. The side bolsters on the seat surface and backrest can also be individually adjusted for precise lateral support on curves and added comfort on long journeys.

Full bucket seats.¹⁾

The full bucket seats are made of carbon-fibre reinforced plastic (CFRP) with carbon-weave finish. This provides especially good lateral support at minimal weight. The fore/aft adjustment is manual, the height adjustment is electric.

¹⁾ Sports seat Plus²⁾

²⁾ Adaptive Sports seat Plus²⁾

³⁾ Full bucket seat²⁾

¹⁾ Child seats are not compatible with the full bucket seats.

²⁾ Each shown in conjunction with decorative stitching in contrasting Silver colour.

Closely connected to the driver.
And everything else too.

Navigation and infotainment.

Porsche Connect.

On the race track or on the road: Porsche Connect expands the existing vehicle functions of the 718 Spyder with smart services and apps. All designed to make the connection between driver and car even closer. To improve Porsche fascination. And to overcome the challenges of everyday life, fast and simply. You can also do without the audio and communication system, if you want. When the way there is your destination you don't need a navigation system.

Porsche Communication Management (PCM).

Porsche Communication Management (PCM) is your central control centre for audio and communication. The latest generation features a high-resolution 7-inch touchscreen display which can be used to control many of the vehicle functions. On the move, you can enjoy your favourite music via the CD/DVD drive, SD cards, internal 10GB hard drive (jukebox), the AUX input or the USB connection, for your

iPhone, for example. Or you can simply listen to the radio. Your 718 also enables you to use countless Car Connect Services via smartphone, such as vehicle positioning. The optional smartphone compartment in the centre console transfers your mobile phone signal to the external aerial of the car – conserving phone charge and providing optimum reception.

Navigation including Porsche Connect.

Thanks to Real-time Traffic Information, the optional navigation module including Porsche Connect gets you to your destination quicker, and offers you numerous Porsche Connect services. You can use all the online functions with the help of the integrated LTE communication module with SIM card reader. In some countries, an integrated LTE-compatible SIM card with data allowance is also included, with which you can use Porsche Connect services such as navigation and infotainment services.¹⁾

1) Porsche Connect services include a free inclusive period of use, the length of which may vary by services package and country but shall not be less than three months. The full range of Porsche Connect services or individual services thereof may not be available in some countries. The Breakdown and Emergency Call services included in certain models are available in selected countries for 10 years after the production date. Availability also depends on the country-specific variants of the vehicle. In addition, an integrated SIM card with data allowance for use of selected Porsche Connect services will be included in the price in some countries. For use of the WiFi hotspot and the other non-included Porsche Connect services, e.g. music streaming, via integrated SIM card in some countries, a chargeable data package is also available from the Porsche Connect Store. Alternatively, you can establish a data connection using a SIM card of your own. For further information on free subscription periods, follow-on costs and availability of individual services in your country, please visit the 'Availability' area in the Porsche Connect Store at www.porsche.de/connect-store or consult your Porsche Centre.

Smartphone apps.

In addition to its range of smart services, Porsche Connect also offers three smartphone apps. The Porsche Connect app allows you to send destinations to your Porsche before you start your journey. As soon as your smartphone has connected to PCM, you will be able to display these in the vehicle and start route guidance directly. Even your smartphone calendar can be viewed directly on PCM and stored addresses used for navigation. What's more, the Porsche Connect app gives you access to millions of music tracks thanks to its built-in music streaming function.

The Porsche Car Connect app lets you use your smartphone or Apple Watch to retrieve vehicle data and remotely control selected vehicle functions. Another feature is the Porsche Vehicle Tracking System (PVTS) including theft detection.

The new Porsche Track Precision app¹⁾ with a fully optimised interface that is even easier and more intuitive to use

enables your detailed driving stats to be displayed, logged and analysed on your smartphone. On the race track, the app visualises dynamic performance and, in addition to sector and lap times, also shows how the current lap compares with a defined reference lap. Recorded stats, circuit and driver profiles can be managed and shared directly from your smartphone.

Visit www.porsche.com/connect to discover more about the available apps and services. The range of Porsche Connect services is regularly expanded.

Apple CarPlay.

The optionally available Apple CarPlay function enables you to connect your iPhone to your Porsche and have certain apps shown directly on the central display screen of Porsche Communication Management (PCM). With the Siri voice recognition interface, you can conveniently use your apps on the move while keeping your full concentration on the road.

My Porsche.

Every Porsche can be configured to your preferences. Porsche Connect is the same. Using My Porsche, you can retrieve relevant vehicle data and personalise your Porsche Connect services to suit your interests. By adding new destinations for your navigation system, for instance, or selecting your favourite sources for the news articles that you want to have read aloud in the car. My Porsche also lets you create additional users – such as family members or friends.

Porsche Connect Store.

Would you like to extend your initial free subscription period? Or purchase additional Porsche Connect services? Visit the Porsche Connect Store at www.porsche.com/connect-store and discover more about what Porsche Connect has to offer.

1) App usage permitted on private land only. Operation of this product (including the video recording feature in particular) could be prohibited by laws or regulations in specific markets or events. Before any use of this product, please check that this is permitted under local laws and regulations.

A close-up, high-angle photograph of a car's interior speaker. The speaker is a triangular shape with a silver-colored metal grille. The word "Burmester" is embossed in a cursive font on the upper part of the grille. The surrounding car interior is dark and textured, likely leather or a similar material. The lighting is dramatic, highlighting the metallic sheen of the grille and the texture of the surrounding surfaces.

Sound Package Plus.

The Sound Package Plus ensures an excellent sound. The acoustic pattern in the vehicle interior is perfectly adapted to the driver and passengers by the amplifiers integrated into PCM.

BOSE® Surround Sound System.

The optional BOSE® Surround Sound system has been specially developed for the 718 models and is optimally tuned to the specific interior acoustics of these particular vehicles. The audio system features 10 loudspeakers and amplifier channels including a patented, 100-watt active subwoofer integral to the vehicle bodyshell. This fully active system set-up enables each individual loudspeaker to be optimally adapted to the vehicle interior. The total output: 505 watts. Should you ever want to drown out the resonant sound of the engine. For whatever reason.

Burmester® High-End Surround Sound System.

For even greater listening pleasure: the optional Burmester® High-End Surround Sound System. With a total output of 821 watts and 12 individually controlled loudspeakers, including a 300-watt active subwoofer with class D digital amplifier integrated into the body, it provides a unique sound experience – even with an open hood. Sophisticated high-end audio components, e.g. special ribbon tweeters (air motion transformers, AMT), and a total diaphragm surface area of more than 1,340cm² enable precision playback even at very high sound levels. A wide selection of preset equalisers ensures a first-class audio experience, while a sound conditioner based on microphone technology adapts the sound sensitively and in real time to the driving situation.

Perfectly irrational.
Absolutely.

You turn on the engine – and it won't let you rest again. It takes you out to the mountain pass roads and brings tears to your eyes. It won't let you sleep, makes you get up at 6 a.m. on a Sunday morning, and doesn't let you go. It makes no sense. And perhaps that's why it's so much fun.

The 718 Spyder is a pure driving machine. Is it even possible to improve? Probably not. But it can be reinterpreted. And brought even closer to motorsport. The 718 Cayman GT4 brings to the race track what the 718 Spyder brings to the road: a sense of irrationality that promises unending driving pleasure.

The 718 Cayman GT4 and the 718 Spyder.

Personalisation

**Your inspiration.
Our passion.**

Porsche Exclusive Manufaktur.

Our wealth of experience goes back a long way. Since the very beginning, Porsche has been dedicated to realising customers' wishes. Known until 1986 as the 'Sonderwunschprogramm', then Porsche Exclusive – and now Porsche Exclusive Manufaktur.

We love what we do. We love our work. Every seam, every square inch of leather and every other fine detail receives the same devotion. We transfer our experience and passion to the vehicle, together with your inspiration – thereby bringing dreams to life. Directly on the shop floor.

None of this would be possible without originality, enthusiasm and attention to detail, beginning as early as the consultation stage. Because we keep one thing in mind above all else: meeting your individual requirements, thereby turning 'a Porsche' into 'your Porsche'.

And how do we turn your dreams into reality? With composure and meticulous care, by means of precision handcrafting and the use of exquisite materials such as leather, carbon or Race-TEX. Added value is achieved through dedication and finesse. Or to put it another way: the intersecting of sporty performance, comfort, design and your personal taste. A Porsche with your signature touch.

We offer a wide range of refinement options. Both visual and technical. For the interior and exterior. From a single alteration to extensive modifications. Because your inspiration is our passion.

Take inspiration from our examples on the following pages and visit www.porsche.com/exclusive-manufaktur to learn all about how to configure these extraordinary vehicles.

A configuration example from the Porsche Exclusive Manufaktur.

Technical data.

Engine	Manual
Design	Aluminium horizontally opposed and naturally aspirated engine
Number of cylinders	6
Displacement	3,995cm ³
Power (DIN) at rpm	309kW (420hp) 7,600
Max. torque at rpm	420Nm 5,000–6,800
Maximum engine speed	8,000rpm
Transmission	
Drive	Rear-wheel drive
Manual	6-speed
Chassis	
Front axle	Lightweight spring-strut suspension, anti-roll bar, selected suspension mountings ball-jointed
Rear axle	Lightweight spring-strut suspension, helper springs, anti-roll bar, selected suspension mountings ball-jointed
Steering	Electromechanical direct steering with variable steering ratio and steering pulse generator
Turning circle	11.4m
Brakes	Six-piston aluminium monobloc fixed brake calipers at front, four-piston aluminium monobloc fixed brake calipers at rear, discs internally vented and cross-drilled
Brake disc diameter	380mm front and rear
Vehicle stability system	Porsche Stability Management (PSM)
Wheels	Front: 8.5 J × 20 ET 61 Rear: 11 J × 20 ET 50
Tyres	Front: 245/35 ZR 20 (sports tyres) Rear: 295/30 ZR 20 (sports tyres)

Performance	Manual
Top speed	301km/h
0–100km/h	4.4secs
0–160km/h	9.0secs
0–200km/h	13.8secs
Flexibility (80–120km/h)	6.0secs
Unladen weight	Manual
DIN	1,420kg
EC ¹⁾	1,495kg
Permissible total weight	1,720kg
Dimensions/aerodynamics	
Length	4,430mm
Width (including exterior mirrors)	1,801mm (1,994mm)
Height	1,258mm
Wheelbase	2,484mm
Luggage compartment volume, front/rear	150 litres/120 litres
Tank capacity	64 litres
Drag coefficient (cd)	0.34

1) Weight is calculated in accordance with the relevant EC Directives and is valid for vehicles with standard specification only. Optional equipment increases this figure. The figure given includes 75kg for the driver.

Fuel consumption²⁾/emissions²⁾	Manual
Urban, in l/100km	15.8
Extra urban, in l/100km	8.5
Combined, in l/100km	11.3
CO ₂ emissions combined in g/km	258
Emissions standard	Euro 6b

2) Data determined in accordance with the measurement method required by law. The figures do not refer to an individual vehicle nor do they constitute part of the offer. They are intended solely as a means of comparing different types of vehicle. Fuel consumption calculated for vehicles with standard specification only. Actual consumption and performance may vary with items of optional equipment. A vehicle's fuel consumption and CO₂ emissions depend not only on its efficient use of fuel but also on driving style and other non-technical factors. You can obtain further information about individual vehicles from your Porsche Centre.

Important information for Australian and New Zealand customers: Please note the above fuel consumption and emission data does not apply to Australian and New Zealand model vehicles and must not be relied upon. For current data that applies to Australian or New Zealand vehicles, please contact your Official Porsche Centre or visit www.porsche.com.au in Australia or www.porsche.co.nz in New Zealand.

Tyre type	Dimensions	Energy efficiency class/ rolling resistance	Wet grip class	External rolling noise* (class)	External rolling noise (dB)
Sports tyres	245/35 ZR 20	E	E-C	🔊 - 🔊	70-69
Sports tyres	295/30 ZR 20	E	E-C	🔊 - 🔊	73-70
Summer tyres	245/35 ZR 20	E	B	🔊	71
Summer tyres	295/30 ZR 20	E	B	🔊	73

For logistical and technical reasons relating to the production process, we are unable to accept orders for a particular make of tyre.
 * 🔊 Quiet rolling noise, 🔊 Moderate rolling noise, 🔊 Loud rolling noise.
