

# SIX PACK

The new members of the Panamera series are efficient and nimble on their feet, and at the same time provide outstanding performance and a high level of comfort for four people. One year after the premiere of the eight-cylinder model, the new series is adding two new six-cylinder models: the Panamera and the Panamera 4.

## PREMIERE

PANAMERA  
PANAMERA 4

A NEW STAR IN THE FAR EAST: FOLLOWING THE WORLD PREMIERE OF THE PANAMERA IN SHANGHAI IN 2009, TWO SIX-CYLINDER MODELS ARE NOW MAKING THEIR BIG DEBUT IN BEIJING.

In the wake of its successful market launch, the Panamera family is promptly expanding. Starting in May, the Panamera and the Panamera 4 will be available as new entry-level models in the Gran Turismo series. Both will be powered by a newly developed 3.6-liter V6 engine with direct fuel injection and 220 kW (300 hp) as well as 400 Nm (295 lb.-ft.) peak torque. The Panamera brings its power to the road via its rear wheels, whereas the Panamera 4 has active all-wheel drive as a standard feature.

These new Gran Turismo models are an impressive outcome of the resolute "Porsche Intelligent Performance" development strategy. Comprehensive lightweight construction makes it possible to have both efficiency and high Porsche performance in the V6 Gran Turismo. Curb weight for the Panamera comes in at just 1,730 kilograms (3,800 lbs.).

### TECHNICAL SPECIFICATIONS PANAMERA

<b>Displacement:</b>	<b>3,605 cc</b>
<b>Power:</b>	<b>220 kW (300 hp)</b>
<b>Maximum torque:</b>	<b>400 Nm (295 lb.-ft.)</b>
<b>Top track speed*:</b>	<b>259 km/h (161 mph)</b>
<b>Acceleration*:</b>	<b>0-100 km/h (0-62 mph) in 6.3 sec.</b>
<b>Engine:</b>	<b>3.6-liter V6</b>
<b>CO<sub>2</sub> emissions*:</b>	<b>218 g/km</b>
<b>Fuel consumption (NEDC)*:</b>	<b>9.3 l/100 km</b>
